

DYNA GREEN™

COPPER

LIQUID FOLIAR ELEMENT

PRODUCT INFORMATION

Dyna Green Copper is a liquid foliar formulation designed to correct and prevent copper deficiencies in most crops. If added to the spray tank first it will aid in lowering the water pH. A jar test to check the compatibilities of new or unfamiliar combinations should be performed prior to mixing and application. The addition of a non-ionic surfactant and /or urea nitrogen will aid in uptake.

DIRECTIONS FOR USE

Dyna Green Copper should be applied at weekly intervals at 1 to 2 pints per application in enough water to cover. **Aerial application:** Apply 1 to 2 pints per acre in enough water to cover.
